## SUMMARY

Motivated Full-Stack Web Development student at Red River College Polytechnic with hands-on experience building responsive and user-focused web applications. Passionate about writing clean, maintainable code and creating accessible, intuitive user interfaces. Strong problem-solving abilities, attention to detail, and ability to learn new technologies quickly. Seeking a Junior Developer position to contribute to real-world projects and grow within a collaborative development team.

---

## SKILL

**Front End:** HTML5, CSS3, JavaScript (ES6+), React, Responsive Design, Flexbox, CSS Grid, DOM Manipulation

**Back End:** PHP, MySQL, SQL, REST API basics

---

## EXPERIENCE

### Web Developer

January 2025 - Present

- Built and maintained full-stack and frontend web applications using modern web technologies including React, JavaScript, PHP, and MySQL.
- Designed responsive UI components focused on usability, accessibility, and clean user experience.
- Implemented dynamic functionality such as API integration, form handling, and local storage features.
- Managed version control and collaboration workflows using Git and GitHub.
- Deployed production-ready projects to live hosting platforms for public access and portfolio presentation

### Links and descriptions of key projects:

#### 1. Portfolio Website

Personal portfolio website showcasing my projects, skills, and experience. Built with HTML, CSS, JavaScript, and includes responsive design, animations, and contact form integration.

#### 2. To-Do App

Built with HTML, CSS, and JavaScript, featuring CRUD functionality and localStorage for persistent task management.

#### 3. Typing Speed Test App

Interactive app that measures WPM, accuracy, and typing errors using JavaScript event handling.

#### 4. Weather App (React)

React application using OpenWeather API with geolocation-based weather detection.

#### 5. Photography CMS (Full-Stack PHP)

Full-stack CMS built with PHP and MySQL with admin panel and CRUD functionality.
